**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a method of delivering an identifier using re-issuing feature, classified in class 705, subclass 10.
- II. Claims 11-14, drawn to a method of delivering an identifier using an adding feature, classified in class 705, subclass 1.
- III. Claims 15-20, drawn to a system for delivering an identifier using an interceptor, classified in class 709, subclass 208.
- IV. Claims 21-30, drawn to a method of identifying a referring source, classified in class 705, subclass 14.

The inventions are distinct, each from the other because:

Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an on-line coupon process of awarding a web visit. See MPEP § 806.05(d).

Inventions II and I,III,IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a CD of the month club and if enrolled, offering a CD to requester. See MPEP § 806.05(d).

Art Unit: 3627

Inventions III and I,II,IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a child internet monitoring device to control what web sites are visited by user.

See MPEP § 806.05(d).

Inventions IV and I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as a way of communicating between parties without transmitting text messaging using embedded code. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
